EXPERIENCE

Philips Software Engineer - I	Sep 2024 - Present Bengaluru, India (Hybrid)
---	--

- Helped deliver the IRT 2.0 to 3.0 release by building Kubernetes and Argo CD deployment infrastructure, troubleshooting HTTPS ingress uploads and verifying releases.
- Built the IRT 3.0 interface for large language model (LLM) and retrieval-augmented generation (RAG) workflows, including uploads, configurable analyses, job monitoring and result previews.
- Created a PostgreSQL-backed AI usage dashboard with adoption reporting, admin data management and audit history.
- Delivered 10 automation keywords and validation and confidence test triggers, fixing image-overlay and UI validation defects.
- Integrated and deployed model-selectable Azure OCR with compatible outputs and bounding boxes, plus downstream value-matching support.
- Migrated icon, image and frame-speed analysis modules with unit and integration tests. Currently contributing to artefact detection development.
- Supported deployment workflows and status monitoring across 5 locations, including AWS infrastructure, server maintenance and UI releases.
- Rebuilt an internal complaint tool's UI and connected backend workflows. Contributed to 5 merged pull requests fixing text and hyperlink issues in the test-results viewer.

Philips Software Engineer Intern	Aug 2023 - Aug 2024 Bengaluru, India
--	--

- Developed frontend and backend features for FetView ultrasound reporting using PHP, JavaScript, Java, Ember.js, HTML, CSS and SQL.
- Supported Docker integration and functionality enhancements for ultrasound-related projects.

EDUCATION

Vellore Institute of Technology Integrated M.Tech in Computer Science and Engineering	2019 - 2024 Vellore, India
---	--------------------------------------

SKILLS

- **Programming and web:** JavaScript, Python, Java, PHP, SQL, PostgreSQL, Ember.js, HTML, CSS.
- **Cloud and releases:** AWS, Kubernetes, Argo CD, Docker, CI/CD, Git, GitHub, server maintenance.
- **AI application integration:** LLM/RAG interfaces, Azure OCR, image analysis, AI usage monitoring.
- **Software quality:** Test automation, unit testing, integration testing, UI and backend issue resolution.
